

## Make facilities safer and more secure.

essentry is an enterprise-grade visitor management platform that secures and manages the entire cycle of visitor operations. Powered by biometric technology. Made in Germany.

**Modular and customizable**

**Border control-grade identity verification**

**Fully automated**

**Seamless integration into existing processes and IT systems**

**Delivered as a managed service**

### Visitor management process.

#### Cycle management.

Configure location and visitor type-specific check-inflows. Manage required health and safety documents and training, NDA's, and ensure compliance to local regulations.

#### Invitation.

Enable consistent invitation creation and approval process. Send branded invites including directions and useful information to ensure a great first impression of your company.

#### Online check-in.

Enable your visitors to check-in online, conduct safety briefings, and sign required documents - long before their arrival.

#### Identity verification.

Guide your visitors through a fully automated identity verification and biometric face matching. With more than 4,000 government-issued IDs from 196 countries, including all 50 US states, we have all your visitors covered.

#### Covid-19 health screening.

Optionally, the self-service kiosk can perform an automated, GDPR-compliant, and contactless body temperature measurement as well as health status queries.

#### Access.

Automatically issue your visitors either a printed name badge or an RFID-card with the specific permissions for this particular visitor after a successful authentication – thanks to our seamless integrations into the most common access control systems.

#### Visit and notifications.

Create a seamless on-site experience. Help visitors find their right location and quickly meet their host or navigate them to their point-of-interest. Automatically notify hosts about the arrival of visitors.

#### After registration.

Understand who is on-site, include visitors or contractors into safety or emergency protocols, speed up check-in for returning visitors, and leverage visitor data to improve operations.

## Full-service solution.

We take care of the entire process from solution design and hardware to 24/7 support and ongoing optimization.

- 01 Solution design
- 02 Procurement and installation
- 03 Customer infrastructure and integrations
- 04 Operate, monitor, and support
- 05 Analysis and optimization

## Benefits.

### Uncompromised security.

Mitigate risk to protect your most important assets with a multi-layered approach. Border control-grade identity verification and biometric face recognition.

### Improve process efficiency.

Reduce the Total Cost of Visitor Access (TCVA) through the highest levels of process automation. This results in a clear return on investment.

### Elevate user experience.

Turn every visitor into a VIP with a customized and intuitive check-in experience, while providing unparalleled security for your company.

## We understand enterprise requirements.

essentry originates from the demanding data center industry where high-security facilities are an absolute necessity. We deliver the highest degree of access security to this sector along with the strictest levels of data protection, data security standards, and compliance. We apply these same enterprise-level assurances to any organization regardless of industry, location, or size. We have years of experience integrating into existing building systems to optimize your facility and security operations and make critical processes more secure. Our solution is highly flexible and customizable for our customers' current and future needs.

## About essentry.

essentry is an enterprise-grade visitor management platform to secure and manage the entire cycle of visitor operations. With a unique visitor verification process that uses identity card authentication and face matching, essentry leverages artificial intelligence and biometric technology to make customer facilities safer and more secure. This automated process integrates seamlessly into existing IT systems and replaces inefficient reception procedures. The results delivered are a clear return on investment and an elevated visitor experience without compromising security. essentry originates from the demanding German data center industry where high-security facilities are an absolute necessity. Today, we provide essentry as a managed service that can be used across any industry, organization, or geographic location.
