

# Access Management with Identity Verification

Leverage the potential of biometric technology and artificial intelligence to ensure the highest levels of security and process efficiency.

Made in  
Germany

essentry is certified according  
to ISO 27001 on the basis of  
BSI IT-Grundschutz

## Automate your entire access management process with just one solution.

Protect your corporate assets with border-control level identity verification. Provide your guests with an intuitive and fully automated check-in experience. Heighten the process efficiency with a seamless integration into your existing processes and IT landscapes. Secure the benefits of a solution that adheres to the highest standards for data protection and data security.

### ID verification

We check the authenticity of more than 6,000 identity documents from 196 countries. Using three forms of light – infrared, UV, and white light – we are able to check various identity documents for their individual security features.

### Biometric Face Matching

Using artificial intelligence and biometric technology, we compare the image on the ID document to a 3D portrait photo taken onsite and in real time.

### Automated Access

After successful identity verification, the guest receives an RFID card granting individual access rights. The essentry platform allows you to keep track of who is on site at all times. Use our analytics functions to optimize the process and your company facilities.

Experience essentry  
in practice.

## We deliver a full service solution.

With a managed service approach, essentry is redefining visitor management. We take care of the entire visitor lifecycle from solution definition to process optimization.

### Solution Design

We offer our expertise and experience to overcome your individual challenges and identify the right setup.

### Installation

We manage the hardware shipment and deployment process.

### Integration

We integrate essentry into your existing processes and IT infrastructure.

### Operation and Maintenance

Certified technicians ensure the most recent hardware and software updates to guarantee a smooth operation all the time.

### Support and Monitoring

24/7 support is available for our enterprise customers. Our support team prioritizes each issue and maximizes uptime.

### Analysis and Optimization

We deliver valuable insights about your building with which you can optimize your processes.

## Why essentry?

### Elevate user experience

Treat every visitor with an intuitive and seamless check-in experience, while maintaining unparalleled security for your company.

### Uncompromised security

Mitigate risk to protect your most important assets with a multi-layered approach using border control-grade identity verification.

### Cost efficiency

Reduce the Total Cost of Visitor Access (TCVA) through the highest level of process automation. This results in a clear return on investment.

### High Flexibility

High flexibility and adaptability to individual company needs.

### Easy to deploy

We provide our products "as-a-service", starting from solution design, integration to operation.

### A single platform

essentry allows its customers to manage and govern the entire visitor lifecycle through our single proprietary digital platform.

### Adhere to compliance standards & regulations

Data privacy is a priority at essentry. We ensure that visitor data is protected according to the GDPR and complies with industry-specific regulations and new COVID-19 requirements.

### Seamless integration

Seamless integration into existing processes and IT landscapes.

## About essentry

essentry specializes in the digitalization of access processes. The core product is the verification of personal identities at border-control level and the automation of the access process. Using biometric technology and artificial intelligence, essentry is able to achieve the highest level of security for facilities, employees and guests. essentry integrates seamlessly into existing systems and IT landscapes and increases security to the highest possible level. Because it originated in the demanding data center industry, essentry is characterized by the stringent security requirements prevailing there and adheres to strict regulations regarding data protection, data security and compliance. In addition, essentry has integrated these standards into its products and offers them as a managed service, so that other organizations and industries may easily apply them.
